

I Nyoman Nila Kusuma Atmaja, Frontend Engineer

Bali, Indonesia, +6282236919431, nilaatmaja@gmail.com

PROFILE

I am an experienced front-end engineer with 7 years of experience in crafting dynamic web applications that prioritize user experience and engagement. With my Bachelor's Degree in Computer Science (S.Kom) from Universitas Udayana (Unud), I honed my skills in various technologies, ensuring easy and efficient implementation. My passion is to provide innovative solutions and enhance the user experience through my expertise in ReactJS, JavaScript, TypeScript, HTML, CSS, and various Content Management Systems (CMS).

EMPLOYMENT HISTORY

Aug 2017 — Jan 2021

Frontend Engineer, Mindimedia

Bali

As a Front End Engineer at Mindimedia, I played a key role in developing and maintaining the company's website platform for villas and hotels in Indonesia. My responsibilities included designing and implementing responsive and user-friendly web pages, utilizing technologies such as JavaScript, HTML, CSS, Vue, Nuxt.js, and CMS. Additionally, I helped to optimize the website for search engines and promote it through Google Ads. I collaborated closely with the marketing team to ensure that the website effectively showcased the properties and helped drive bookings. My work at Mindimedia helped the company to successfully promote and generate bookings for their client hotels and villas.

Jul 2020 — Jan 2021

Frontend Engineer, Freelance

Remote

As a freelance Frontend Engineer, I had the privilege of collaborating with one of Indonesia's private banks, to design, develop, and maintain their website. Throughout the duration of the contract, I had a role in enhancing the online presence and user experience for the bank's digital platform.

Jan 2021 — Sep 2023

Frontend Engineer, Hijra

Jakarta (Remote)

As a Front End Engineer at Hijra, I am working on developing a dashboard for ecosystem financing. My role involves utilizing the React.js framework to create an intuitive and visually appealing interface for users. I ensure that the dashboard is robust, efficient, and easy to navigate. My responsibilities include designing and implementing the front-end of the application, testing and debugging, and working with the team to ensure that the product meets the requirements and expectations.

EDUCATION

S.Kom, Universitas Udayana

Bali

SKILLS

React	CSS
JavaScript	Tailwind
TypeScript	SASS
NextJs	Content Management System (CMS)
Git	

INTERNSHIPS

Aug 2016 — Oct 2016

Frontend Engineer, BlueLine

Bali

As a Front End Engineer at BlueLine, I was responsible for developing and maintaining a web-based login system for users accessing the internet services provided by the company. My role involved creating a user-friendly and responsive web interface for users to connect to the WiFi network and access the internet. This includes utilizing technologies such as JavaScript, HTML, CSS, and React.js to design and implement the web pages. I also worked closely with the network team to ensure that the system was properly integrated with the network infrastructure and that it met the security and performance requirements.
